

## REMARKS

Applicant has canceled claims 75-80, amended claims 69-71, 81, 85-90, 91 and 94, and added claims 99-108 to broaden the claims, to correct dependencies brought about by the amendments and/or correct for several minor informalities. All of the claims relate to nebulizing catheters having features such as a curved distal end, which may be j-shaped, or orifices aligned in the distal end such that nebulized liquid is generated in a direction towards or substantially towards the proximal end of the catheter shaft. Support for these claims may be found throughout the specification generally, as for example at FIGS. 27-30 and 75, and pages 39-42 and 84-85. Consideration and entry of the enclosed amendments is respectfully solicited

Respectfully submitted,

Kent E. Genin
